

## EDITORIALS

- 196 Critical importance of effective supervision in postgraduate medical education  
Kevin D Forsyth
- 197 Asthma in older adults: a holistic, person-centred and problem-oriented approach  
Guy B Marks, Leanne M Poulos, Christine R Jenkins, Peter G Gibson
- 199 Evidence-based uncertainty: recent trial results on prostate-specific antigen testing and prostate cancer mortality  
David P Smith, Emily Banks, Mark S Clements, Robert A Gardiner, Bruce K Armstrong

## RESEARCH

- 202 Health and mortality consequences of abdominal obesity: evidence from the AusDiab study  
Adrian J Cameron, David W Dunstan, Neville Owen, Paul Z Zimmet, Elizabeth LM Barr, Andrew M Tonkin, Dianna J Magliano, Shirley G Murray, Timothy A Welborn, Jonathan E Shaw
- 209 Second opinions in oncology: the experiences of patients attending the Sydney Cancer Centre  
Martin HN Tattersall, Rachel F Dear, Jesse Jansen, Heather L Shepherd, Rhonda J Devine, Lisa G Horvath, Michael J Boyer

## HEALTH CARE

- 213 Patient privacy versus protecting the patient and the health system from harm: a case study  
Dawn E DeWitt, Stephanie A Ward, Sandeep Prabhu, Bruce Warton
- 217 "Through a glass, darkly": the clinical and ethical implications of Munchausen syndrome  
Michael D Robertson, Ian H Kerridge

## FOR DEBATE

- 220 Clinical supervision by consultants in teaching hospitals  
Craig T Hore, William Lancashire, Robert G Fassett

## VIEWPOINT

- 223 The role of research in the failure of the alcopops excise in Australia: what have we learned?  
Anthony Shakeshaft, Christopher M Doran, Joshua Byrnes
- 226 Screening for prostate cancer: explaining new trial results and their implications to patients  
Alexandra L Barratt, Martin R Stockler

## HISTORY

- 230 The King versus Aleck Bourne  
Caroline M de Costa

## NOTABLE CASES

- 232 Imported West Nile virus encephalitis in an Israeli tourist  
Benjamin A Rogers, Linda Hueston, Irani Ratnam

- 236 **LETTERS**  
(contents overleaf)

### DISMEMBERING GPs

A quiet revolution has been taking place, driven by both ideology and pragmatism. Its aim is to dismantle general practice and eviscerate the ranks of its medical practitioners. The signals are loud and clear.

In 2008, Nicola Roxon delivered the annual Ben Chifley Memorial "Light on the Hill" address to the Labor Party faithful, in which she outlined her vision for the public health sector, proposing that health care services be delivered by new players in ubiquitous teams. Unfortunately, there was little clear delineation of the respective roles of the members of these teams, which appeared to be amorphous and overlapping. Such a proposal inevitably begs two questions: will the services offered be safe, and will they be cost-effective?

However, Roxon's address has given the green light to setting in motion a series of actions that will effectively dismember general practice as we now know it.

Understandably, this proposal has received strong support from nursing associations, and, almost 1 year on, nurse practitioners are to be granted access to the Medicare Benefits Schedule and a restricted Pharmaceutical Benefits Scheme, as well as the capacity to order investigations and refer patients. Also of significance is the Australian Capital Territory "trial" of nurse-only clinics.

Following on the heels of this quiet revolution are calls for the term "general practice" to be buried and replaced with "primary care". And, interestingly, there is a push for another change — namely, that all practitioners working in primary care, irrespective of their qualifications and expertise, be now called "doctor". Such a collaborative model readily brings to mind the sovietisation of health care.

Whatever the motivations for this change, its perpetrators can claim "mission accomplished!" Powerful political forces will take care of the general practitioner. Sadly, concerted political manoeuvring by those with the ear of the Minister has exposed the disorganisation and naivety of some in organised medicine. Their response conjures up images of lemmings rushing towards oblivion.

Martin B Van Der Weyden

## LETTERS

- Syphilitic perioptic neuritis mimicking papilloedema**  
236 Grace SH Low, Robert H Edis
- Challenging respiratory infections in cystic fibrosis**  
236 Abdullah A Yousef, Adam Jaffé
- What can public health surveillance of emergency department presentations for acute alcohol problems tell us about social trends in drinking behaviour?**
