Re: “**Warfarin reversal: consensus guidelines, on behalf of the Australasian Society of Haemostasis and Thrombosis**”, by Ross I Baker, Paul B Coughlin, Alex S Gallus, et al on behalf of the Warfarin Reversal Consensus Group (*Med J Aust* 2004; 181: 492-497). In Box 5, an asterisk in the Box title should have attributed Prothombinex-HT to CSL Limited, the manufacturer of all plasma-derived therapeutic products fractionated from Australian plasma. □

Re: “**The hidden tragedy of offender deaths**”, the editorial by Stuart Ross in the 1 November issue of the Journal (*Med J Aust* 2004; 181: 469-470). The reference numbering in the text is incorrect because of a computer error. In the first 3 paragraphs, references 12, 13, 14 and 15 should be references 1, 2, 3 and 4, respectively. All other references are correct, except for reference 13 in the last paragraph of the text, which, again, should be reference 2. □

Re: “**Postnatal evaluation of vitamin D and bone health in women who were vitamin D-deficient in pregnancy, and in their infants**”, by Thomson K, Morley R, Grover SR and Zacharin MR in the 1 November 2004 issue of the Journal (*Med J Aust* 2004; 181: 486-488). The first author’s name was incorrectly given as “Katherine Thompson”. The correct name is “Katherine Thomson”. □
