

## EDITORIALS

- 299 Doctors behaving badly?  
Martin HN Tattersall, Ian H Kerridge
- 301 Clinical guidelines: what can we do to increase their use?  
Richard Grol, Heather Buchan
- 302 Prisons: mental health institutions of the 21st century?  
Paul White, Harvey Whiteford
- 304 Suicide in Australia: some good news  
Robert D Goldney

## RESEARCH

- 305 Diabetes guidelines: easier to preach than to practise?  
A retrospective audit of outpatient management of  
type 1 and type 2 diabetes mellitus  
Wendy Bryant, Jerry R Greenfield,  
Donald J Chisholm, Lesley V Campbell
- 310 Implementing iron management clinical practice guidelines  
in patients with chronic kidney disease having dialysis  
Michelle J Irving, Jonathan C Craig, Martin Gallagher, Stephen  
McDonald, Kevan R Polkinghorne, Rowan G Walker, Simon D Roger
- 315 Suicide in the Northern Territory, 1981–2002  
Mary-Anne L Measey, Shu Qin Li, Robert Parker, Zhiqiang Wang

## FOR DEBATE

- 320 Potential impact of AUSFTA on Australia's  
blood supply  
 Hilary J Bambrick, Thomas A Faunce, Kellie Johnston
- 324 Should medical students be routinely offered  
BCG vaccination?  
Maryza Graham, Tanya M Howley, Robert J Pierce, Paul D Johnson

## VIEWPOINT

- 327 Inhalant misuse in youth: time for a coordinated response  
Dan I Lubman, Leanne Hides, Murat Yücel

## LESSONS FROM PRACTICE

- 331 Scurvy in an otherwise well young man  
Sally J Mapp, Paul B Coughlin

## MJA PRACTICE ESSENTIALS — ALLERGY

- 333 3. Drug hypersensitivity  
Francis CK Thien
- 339 Latex allergy  
Constance H Katelaris

- 341 **LETTERS** (contents overleaf)

### TILTING AT TITLES

The call “Is there a doctor on board?” is unambiguous. There may be doctors of philosophy, science or literature “on board”, but there is no confusion as to what sort of doctor is needed.

In the United Kingdom, and less so in Australia, medicine's titles include Doctor, Mister and Miss. The appellation, Mister (Master), follows a tradition reaching back to the 16th century, when Henry VIII granted a royal charter to the Company of Barber-Surgeons. The demarcation was clear — physicians were university graduates and surgeons were apprentices of Barber-Surgeons.

Two centuries later, surgeons split from the Company, but clung to their distinctive title. Now it seems that the days of Mister or Miss are numbered.

With the increasing involvement of non-medically qualified professionals (many with PhDs) in health care, patients are confused about who, of the Doctor, Mister or Miss, is actually their doctor. The late Hugh Phillips, past president of the Royal College of Surgeons of England, labelled the use of Mister as old tribalism and anachronistic. He argued for surgeons to return to the title of Doctor, noting: “There has been concern recently about who people are in the health service — who is actually treating you? It is not always absolutely clear to the patient, I suspect, and it is not even clear as to whether someone is a doctor.” Whether UK surgeons will heed this advice has yet to be resolved.

In Australia, surgeons who persist in using Mister are in the minority. But given Australia's egalitarianism and low tolerance of titles, should we not trash titles altogether? Should we not stress expertise and competence, and move to: “Hello. I'm Jean Smith. I am a urologist and together we will confront your prostate problem”? This would put patients firmly in the picture.

Martin B Van Der Weyden

### LETTERS

- Early medical abortion in Australia: more common than statistics suggest?  
341 Caroline M de Costa
