Nicholas R Wilcken, Val J Gebiski, Rhana Pike, Anthony C Keech

## LESSONS FROM PRACTICE

- 371 Accidental paracetamol poisoning  
John S Lubel, Peter W Angus, Paul J Gow

## DIAGNOSTIC DILEMMAS

- 373 What may underlie recurrent purpura fulminans?  
Karina J Kennedy, Sarah Walker, Paul Pavli, Lavinia Hallam, Chris Hemmings

## LETTERS

- 378 (contents overleaf)

## MJA SUPPLEMENT

- S1-S40 Australian Curriculum Framework for Junior Doctors

### MEDICAL STUDENT SELECTION — WE HAVE TO FIND ANOTHER WAY

*Some may suggest it is time to ask some hard questions of our medical school selection policies. Is the requirement for equality, diversity and political correctness getting in the way of selecting the best and most motivated?\**

Few issues arouse more passionate debate than the admission policies of our medical schools and their ever-changing educational philosophies and course content.

When it comes to student selection, most schools rely upon combinations of academic scores and cognitive aptitude assessment, followed by the elaborate and expensive lottery — the interview. But whether these prove to be reliable barometers, predictive of good doctors or good practice, remains dubious.

The pragmatic Dutch have long recognised the nebulous nature of these exercises and instead use a state-run lottery for student selection: the higher your academic achievement, the more lottery tickets you receive! Yet in this era of best evidence, Australian medical schools continue with their evidence-poor selection rituals.

Is it not time to move to a uniform, Australia-wide system to allow for, at the very least, prospective and national data and best evidence?

But there is another concern.

Geoff Norman, a prominent Canadian medical educationalist, argues that our current medical school selection processes are “evil”, claiming that in “selecting the 10% who are worthy of admission (and hence guaranteed an esteemed and well paid place in society), we are telling the other 90% that they are unworthy ... Yet the evidence we have [for selection] is likely little better than a horoscope.”

Instead of continuing with this “professional crap shoot”, we have to find another way.

### The MJA BookClub Winner Wired for Sound

Congratulations to Dr Shibu Sengupta of Port Macquarie, NSW, winner of the February MJA BookClub prize of a Creative Zen Nano Plus MP3 Player (1GB) with LCD and FM Radio. Thanks to all the doctors, students and general health care professionals who purchased books from the February MJA BookClub and went into the draw. Pictured right is Peter Butterfield, AMPCo Sales Manager, drawing the winner. To see this month's MJA BookClub's great prize give-away, see page 335 and the inside back cover of this issue.
