

## Appendix 3

**This appendix was part of the submitted manuscript and has been peer reviewed. It is posted as supplied by the authors.**

Appendix 3 to: Duke GJ, Barker A, Knott CI, Santamaria JD. Outcomes of older people receiving intensive care in Victoria. *Med J Aust* 2014; 200: 323-326. doi: 10.5694/mja13.10132.

**Appendix 3:** Box-plot of predicted risk of death, Pr(death), as an indicator of admission acuity for older age patients ( $\geq 65$  years) admitted to an Intensive Care Unit in the State of Victoria for financial years 2000-2011.

White lines indicate medians, boxes indicate interquartile ranges, and error bars indicate upper and lower quartiles.

Calculation of Pr(death) derived from Duke GJ, Barker A, Santamaria JD, Hutchinson A, Rasekaba T. Development and Validation of the Critical care Outcome Prediction Equation (COPE) version 4. Crit Care Resusc. 2013; 15(3):191-197.
