

Appendix 2

**This appendix was part of the submitted manuscript and has been peer reviewed.
It is posted as supplied by the authors.**

Appendix to: The Concord Medical Emergency Team (MET) Incidents Study Investigators. Incidents resulting from staff leaving normal duties to attend medical emergency team calls. *Med J Aust* 2014; 201: 528-531. doi: 10.5694/mja14.00647.

Appendix 2 – Proportion of incidents reported as a result of staff leaving normal duties to attend Medical Emergency Team (MET) calls, by time of day

I-bars indicate 95% confidence intervals. There were significant differences in the proportions of incidents between the time of day using the Pearson Chi-Square test (comparing daytime to evening $p=0.001$; comparing daytime to nighttime $p<0.001$; and comparing evening to nighttime $p=0.018$).
