

Appendix 6

**This appendix was part of the submitted manuscript and has been peer reviewed.
It is posted as supplied by the authors.**

Appendix to: Buckley NA, Whyte IM, Dawson AH, Isbister GK. A prospective cohort study of trends in self-poisoning, Newcastle, Australia, 1987–2012: plus ça change, plus c'est la même chose. *Med J Aust* 2015; 202: Online first 27 April 2015. doi: 10.5694/mja mja14.01116.

Figure S4. Changes in rates of use of antidepressant drug classes and antidepressant overdoses (A) and poisoned patients taking therapeutic antidepressants (B) in HATS database

Footnote: Figures prior to 1993 are slightly lower as the area wide service was just being established. Dotted lines in panel A indicate 20 year mean for each district. Changes in prescriptions shown in shaded areas. TCAs: tricyclic antidepressants; MAOIs: monoamine oxidase inhibitors; SSRIs: serotonin specific reuptake inhibitors; SNRIs: serotonin noradrenaline reuptake inhibitors; DDDs/1000/day= defined daily doses/1000 people/day.
