Table 2 - Search terms used for searching grey literature

The following terms were used in the grey literature searches individually and in different combinations until no new items were being found (until saturation was reached):

“quality improvement” or “practice improvement” or “performance improvement”, “organisational development”, “organisational improvement”, and/or “general practice”, “primary care”, “primary health care” “health”, “family practice”, “family medicine”, and/or “tool”, “resource”, or “instrument” or “guides” or “framework” or “assessment”, or “survey”, or “intervention”. A search was conducted using a combination of these terms with each of the seven PC-PIT QI elements. E.g. “practice leadership improvement.
