

ERRATUM

Lodge C, Dai X, Laing IA, et al. Evidence from Australian cohort studies about asthma trajectories and transitions across the life course: A narrative review. *Med J Aust* 2025; 223 (10 Suppl): S24–S31. <https://doi.org/10.5694/mja2.70086>.

In Box 3, the second data row should read as follows:

Study	Start year	Age at start, in years (enrollees)	Age at follow-up	Wheeze/ asthma definition	Lung function assessed	Biological samples
Busselton Health studies ³³	1966	7 to > 70 (20 000)	20 to > 90	Standard asthma questions	Spirometry: forced oscillation technique (all studies) airway responsiveness (selected studies)	Blood at 21 surveys that collected asthma data
