

The croupier's view

THE *MJA* now comes to you from downtown Pyrmont, next to Sydney's Darling Harbour and a short roll of the dice from the Sydney Casino. Not only are the premises more fitting for Australia's premier general medical journal, the casino advantage has helped *MJA* staff to deal the best possible hand to our readers.

In the 12 months from 1 July 2001 to 30 June 2002, the *MJA* received 846 manuscripts and 386 letters. The stakes were high for research manuscripts, with an acceptance rate of 23%. A decision to accept a research manuscript took an average of 169 days (this includes peer review, revision and several reviews by the Editorial Committee); a decision to reject took an average of 36 days. Other categories of submissions were less of a gamble, with an overall acceptance rate of 70%, but this includes commissioned articles.

We had two special issues this year: the very popular "Updates in Medicine" as the first issue of the year, and our regular General

Practice issue to coincide with Family Doctor Week in July. *MJA Practice Essentials* has continued with a new series on Infectious Diseases. We have also published many supplements: on early childhood asthma, depression, osteoporosis, chronic fatigue syndrome, the role of fats, and the student and junior doctor in distress.

Publishing quality research is not a matter of Russian roulette, or luck of the draw and, as always, we extend enormous gratitude to our reviewers, listed below. They do a tremendous job and the Journal depends on their enthusiasm and dedication. This year we welcome 10 new members to our Content Review Committee; they meet by teleconference every month to assist with difficult decisions about manuscripts and to contribute ideas for the future direction of the Journal.

A very merry festive season to you all.

Bronwyn Gaut
