

## EDITORIALS

- 348 Health and medical research funding:  
an investment in Australia's future  
Levon M Khachigian
- 349 Medical staff working the night shift: can naps help?  
R Doug McEvoy, Leon L Lack
- 351 Vertebroplasty: a promising but as yet unproven  
intervention for painful osteoporotic spinal fractures  
Rachelle Buchbinder, Richard H Osborne
- 352 Rotavirus vaccine — time to act  
Graeme L Barnes, Ruth F Bishop

## RESEARCH

- 354 Rotavirus gastroenteritis in the Northern Territory,  
1995–2004  
Rosalie Schultz
- 357 A comparison of the mental health of refugees with  
temporary versus permanent protection visas  
Shakeh Momartin, Zachary Steel, Marianio Coello,  
Jorge Aroche, Derrick M Silove, Robert Brooks

## HEALTH CARE

- 363 Use of drug-eluting stents in Victorian public hospitals  
Bryan P Yan, Andrew E Ajani, Stephen J Duffy, Gishel New,  
Mark Horrigan, Gregory Szto, Antony Walton, David Eccleston,  
Jeffery Lefkovits, Alexander Black, Martin Sebastian,  
Angela L Brennan, Christopher M Reid, David J Clark on behalf  
of the Melbourne Interventional Group (MIG) investigators

## REVIEW

- 368 Effectiveness of complementary and self-help treatments  
for depression in children and adolescents  
Anthony F Jorm, Nicholas B Allen, Colin P O'Donnell,  
Ruth A Parslow, Rosemary Purcell, Amy J Morgan

## VIEWPOINT

- 373 The “therapeutic footprint” of medical,  
complementary and alternative therapies  
and a doctor's duty of care  
Christine R Sanderson, Bogda Koczwara, David C Currow
- 377 Integrating complementary therapies into  
mainstream cancer care: which way forward?  
Monica C Robotin, Andrew G Penman

## FROM BENCH TO BEDSIDE

- 381 Alzheimer's disease and frontotemporal dementia:  
prospects of a tailored therapy?  
Jürgen Götz, Lars M Ittner, Nicole Schonrock

## NOTABLE CASES

- 388 Accidental death from acute selenium poisoning  
Katharine A See, Peter S Lavercombe, Jasmine Dillon,  
Riesa Ginsberg

## PERSONAL PERSPECTIVE

- 390 Royal Darwin Hospital Emergency Department,  
Monday 14 October 2002: a medical student's memoir  
David E Chapman

## MJA PRACTICE ESSENTIALS — ALLERGY

- 394 4. Food allergy in childhood  
Katrina J Allen, David J Hill, Ralf G Heine
- 401 Eosinophilic oesophagitis  
Alyson Kakakios, Ralf G Heine

## LEADERSHIP AND MEDICAL TRIBALISM

The recent Royal College of Physicians (RCP) report examining professionalism, identified leadership as an essential prerequisite for our profession in the new millennium. Leadership was also featured in the latest *RACP News* (magazine of the Royal Australasian College of Physicians), which highlighted leaders among the College's Fellows: a state governor, two vice-chancellors of leading universities, 10 deans of medical schools, and the last three chief medical officers of the Australian Government. This is an impressive line-up, but is reaching the pinnacles of the establishment, academia or the bureaucracy synonymous with leadership?

The *Concise Oxford Dictionary* defines a leader as “*n.* **1 a.** a person or thing that leads. **b.** a person followed by others.” But, as noted by a US academic, there is another dimension: “... leadership must be intimately connected to the process of change. The leader expresses not what the group is but what it might be.”

And yet, doctors are not followers, and are wary of change. New medical bodies appear regularly, as John Green, former chief executive of the Royal Society of Medicine and observer of doctors, opines: “There is no kingdom too small for a doctor to be king of.” Medical tribalism appears to be endemic, and is not without its consequences.

Sir Donald Irvine, past president of the United Kingdom General Medical Council, notes: “Tribalism has a profound impact on the profession — we are a dysfunctional profession at that level right through the system, and it is hurting us.” In fact, Dame Janet Smith, Chairman of the Shipman Inquiry, echoes such sentiments: “Tribalism causes doctors as a group to protect themselves, rather than acting collectively.”

The RCP report strongly recommends a “common forum” that speaks “with a unified voice”. With more than 30 medical tribes making up Australian medicine, is this imperative possible?

Martin B Van Der Weyden
